

Penlon SP AGSS Terminal Unit

The Penlon SP AGSS Terminal Unit is compatible with all AGS Receiver Systems that comply with BS 6834:1984 (1992)

- ◆ Complies with BS 6834:1987 (1992), HTM 2022 and C11
- ◆ Integral balance valve is accessible through the front of the outlet
- ◆ Individually tested
- ◆ High quality construction
- ◆ Easy to install and use
- ◆ Three year warranty

Partnership for Life

Product Summary

Anaesthetic Gas Scavenging Systems

Active anaesthetic gas scavenging systems are designed to safely remove exhaled anaesthetic agents from the operating environment and dispose of them to atmosphere, thus preventing contamination of the operating department and providing a safe and healthy workspace for personnel.

As anaesthetic gas scavenging system design is dependent upon flow rate and pressure drop characteristics of the individual components of a system, it is essential that terminal units, remote controls and pumps meet the required standards.

Product Features

Design Features

- ◆ Compliance with BS 6834:1987(1992), HTM 2022, and C11
- ◆ CE marked
- ◆ Composite construction, precision machined
- ◆ Individually pressure and leak tested

Easy to Install

- ◆ Available as a complete kit, or as separate first and second fix components so that installation can be matched to the progress of site work

Safety Features

- ◆ Gas specific indexed - eliminates the risk of connecting a socket assembly of one gas to the terminal block of another, either during installation or maintenance

AGSS Terminal Unit

The Penlon SP AGSS Terminal Unit is compatible in all respects to equipment detailed in BS 6834:1987(1992).

The first fix terminal block is constructed of machined brass and copper. The second fix assembly has an adjustable orifice for flow control, so that system balance can be achieved without the need to remove the fascia plate.

The unit is enclosed in a white ABS decorative mounting box with an ABS fascia plate.

Both the mounting box and the fascia have rounded corners to avoid possibility of injury.

The box can be supplied with a flush mounting bezel as a plaster finish.

Mounting Options

- ◆ Wall mounted, flush fitting or surface fitting
- ◆ Bedhead trunking
- ◆ Pendant or boom, NIST connection

Service and Maintenance

- ◆ Three year warranty from date of manufacture, excluding components designated as service items to be replaced by the customer as part of the published service schedule
- ◆ Throughout the UK our network of service engineers provides full Service and Maintenance support of the highest quality
- ◆ Outside the UK our fully trained distributors provide a similar local service

Component List (complete kit)

- ◆ First fix with testing plug
- ◆ Second fix with valve
- ◆ Installation kit
